

## Installing Adobe Flash Player 10.1 Auto Update

Adobe has released a new update for Adobe Flash Player 10.1. This is a valid and important update that you should install. This update will likely appear when your computer is turned on. You will have three options: Install Now, Remind Me Later, or Don't Install. Proceed to step 1 to install the update.

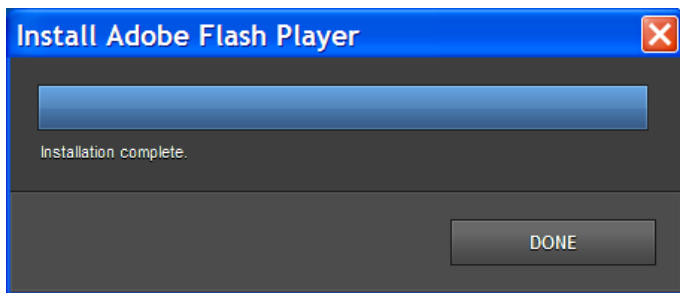

Step 1: When the Adobe Flash Player window appears, **left-click** Install Now.

Step 2: Read the license agreement and check the option that states I have read and agree to the terms of the license agreement.

Step 3: **Left-click** Install.

Step 4: **Left-click** Done when the installation is completed.

Still can't fix it? Email the CAS Resource Center at [fixit@ext.msstate.edu](mailto:fixit@ext.msstate.edu).
