

Changing Screen Resolution

Step 1: Minimize all of the windows that you have open until you have only your desktop showing.

Step 2: **Right-click** on the background of your desktop. **Left-click** Properties.

Step 3: **Left-click** the Settings Tab from the Display Properties window.

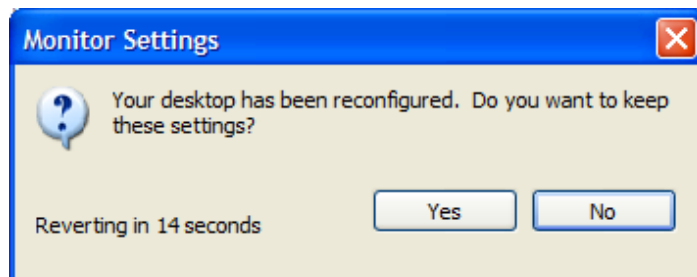

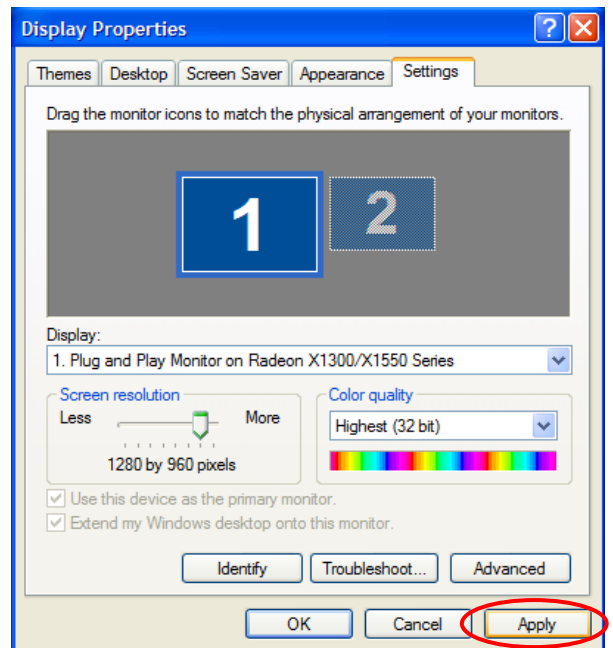

Step 4: Use the Screen Resolution slider to change your resolution.

Step 5: Slide to the left to decrease resolution and make images appear larger. To make images appear smaller, slide the bar to the right to increase resolution.

Step 6: **Left-click** Apply.

Step 7: Your screen resolution will change and give you the option to keep the changes or discard the changes. If you like your current settings **left-click** Yes. If you would like to change them **left-click** No and repeat the steps above.

Still can't fix it? Email the CAS Resource Center at fixit@ext.msstate.edu.
